50MM TILTING DRIVER FOR IMMERSIVE SOUND PERFORMANCE

CRONOS RIING RGB 7.1 | Gaming Headset

The CRONOS Riing RGB gaming headset comes with a new generation tilting 50mm driver that is capable of channeling precision sound into the ear for a more precise audio experience. The use of a tilting driver also provides more space for ear comfort and is ideally suited for gamers who desired comfort with long playtime.

50 mm

**OVERSIZED 50MM
NEODYMIUM DRIVERS
FOR SUPREME
AUDIO QUALITY**

CRONOS RIING **RGB 7.1** | Gaming Headset

A 50mm driver is constructed with a bigger diaphragm, which provides less distortion; and is capable of producing a much clearer and precise sound at both high and low frequencies. This makes audio quality softer and more elastic, which in-turn enables users to experience sound in greater clarity and detail when playing games, watching movies and music listening.
